*Completion of Fontan surgery - High risk Open heart surgery*

The above mentioned patient from Srilanka is diagnosed to have Post BDG shunt (2003), Tricuspid atresia, Restrictive VSD, severe PS, confluent PA. He is advised to undergo surgery within the next one to two weeks. Since this is a high risk Redo heart surgery, it cannot be accomplished safely in Colombo.

The surgery is scheduled to be performed at MIOT Hospitals, Chennai. The procedural package for treatment is USD 6500. The patient seeks financial assistance from the Honorable President's fund and this letter is issued at the request of the parents.

Yours sincerely,
